

Electricity Monitoring

Compatibility:

MeterMate monitoring networks are compatible with virtually any meter (or other sensor) capable of outputting data. Compatibility includes (but is not limited to):

Digital

Pulse-output meters

Analogue (0-20mA, 4-20mA, 0-5V)

Serial RS232/RS485 (compliant with MODBUS, ASCII, ADAM)

Parameters available:

Data available from a MeterMate monitoring network is generally limited only by the data available from the monitored meter or sensor. Economical electricity meters are available to provide:

kWh

Voltage

Current

Power factor

Frequency

Harmonic distortion

Active, reactive and/or apparent power

Active, reactive and/or apparent energy

Pricing:

MeterMate is dedicated to helping clients achieve maximum benefits from a monitoring network. Monitoring packages are customised to best service a clients requirements. For more information or to arrange a cost estimate please contact us to discuss your requirements.
